Green belt review

There has not been a public examination of the council green belt review which has resulted in in totally unsuitable sites being allocated and more suitable sites not allocated.

An illogical site choice is brp 7 which is actually in little heath/potters bar and not brook mans park.at all. The council states in its own review"the gap between little heath and swanley bar would disappear if this were developed . Yet brp7 is allocated in the local plan. Sites not allocated brp6, 9 & ,10 , are not allocated with comment stating , "these sites would impacted on the strategic gap between potters bar and hatfield

These sites are in the same strategic gap as brp7.

Inconsistent and perverse..
