Subject: New Direct Connection to the Southern Outfall Sewer at Rye Meads - Without Prejudice

Dear SC.

Can you please show me where in the '2009 WCS' it states Thames Water recommends a New Direct Connection to the Southern Outfall Sewer at Rye Meads in relation to around Welwyn Garden City & Hatfield in reference to Panshanger.

In the 4th August 2017 meeting Mr GK implied information from a 1990's report was carried over in to the 2009 WCS and which was incorrect affecting the IDP's for the last 5 years.

In your notes you do not acknowledge the 1990's report or that the conversation was about the WCS or that the 1990's report carried over in the 2009 WCS. The notes imply we were discussing the IDP only and in regards to seeing the internal document your notes undermine the conversation I had with GK.

You can't update the IDP or TWU the Position Statement based on a conversation that did not happen.

So if you could just direct me to the portion in the 2009 WCS where it states;

'Thames Water recommends a New Direct Connection to the Southern Outfall Sewer at Rye Meads'; in relation to Panshanger, I should not need to see the 1990's document and it will help me to understand further and save wasting any more of the Gov't Inspectors time with pre screening.

Although I was not represented in the meeting, what I did was email the community leaders the same day so the evidence is still fresh in my mind.

I have copied in my local MP, and am awaiting your prompt response.

Kind Regards,

DM.
