6 EXPLANATION/BACKGROUND:

The aim of the proposed surface water drainage improvements is to reduce the risk of flooding to the Roller city building.

Flooding events in the past have resulted in the need to sand and maintain the wooden flooring. Unfortunately, the wooden flooring may need to be replaced should flooding occur again.

The existing drainage system suffers from blockages, cracks and is under-designed to deal with storm events that modern drainage systems are expected to. This results in internal drainage system failing and flooding occurring within the building.

The proposed surface water drainage systems seek to re-direct as much catchment area as is practicable to an external drainage system, therefore reducing the amount of water that would enter the existing internal drainage system.

As the value of the contract is less than £1 million and considered a routine matter, it does not need to be considered by the General Procurement Board

6.1 Legal Implications:

The Procurement will be undertaken in accordance with the councils Contract Procedure Rules and the Public Contracts Regulations 2015

6.2 Financial Implications:

The value of the one-off contract is estimated at approximately £130,000.

6.3 Risk Implications:

None at this stage

6.4 Other Implications (including communications, security and terrorism, human resources, procurement, climate change, human rights, health and wellbeing, equality and diversity)

None at this stage

6.5 Alternative options considered and reasons for their rejection (if any):

None at this stage

7 BACKGROUND PAPERS USED TO INFORM THE DECISION

7.1 Not applicable

8 DETAILS OF ANY MEMBERS OR OFFICERS WHO HAVE DECLARED AN INTEREST IN THIS MATTER AND NATURE OF ANY SUCH INTEREST AND ANY DISPENSATIONS GRANTED

8.1 None

9 ADDITIONAL CONFIDENTIAL OR EXEMPT INFORMATION CONSIDERED

9.1 No
