Response to EX223 Consultation Regarding Site BrP34 Outside Brookmans Park Green Belt Boundary

Please find attached map showing site BrP34 is not a sustainable location to Brookmans Park being almost two miles to the station and shops without public transport. The strong eastern boundary of Brookmans Park should not be crossed.

The logical sites for development at Brookmans Park are to the north BrP12 and south to BrP6, BrP9 & BrP10.

These sites are only about five minutes walk to the station and six bus routes pass sites BrP6, BrP9 & BrP10.

There are no significant reasons for these sites not to be allocated and could provide over 500 new dwellings in the most sustainable location.

Neil Bedford

Ps. I would like to take part in the Stage 9 Hearing Sessions
